

## BUSINESS INSURANCE

- SPECIALIZED EXPERTS IN YOUR BUSINESS

Individual business owners have specific insurance needs and goals. Wine Sergi has provided insurance services since 1924 for a variety of businesses nationwide. Through that tenure we have realized that even the shrewdest business people cannot account for the many specific, yet imperative, considerations necessary for their businesses insurance coverage. In fact, many businesses are not effectively protected and vulnerable to significant risk, often unknowingly.

Identifying the most beneficial, protective and cost efficient insurance plan requires deep knowledge of your industry, business goals, associated risks and insurance options. While large-scale corporations can retain this specialized knowledge in-house, most businesses do not have these same resources. Not realizing there is a more strategic option, these companies often resign themselves to “commodity coverage”. There is a smarter way to protect and grow your business.

At Wine Sergi, our significant depth of knowledge enables us to definitively craft insurance plans for your specific business needs, with far more consideration and detail than any commoditized package. Working from our suite of 50 national insurers allows our industry specialists to focus on your business and build an exact plan that is fine-tuned to your specific needs.
